LESSON Transcript

00:00:00

The next thing I want to show you now that you are totally familiar with your phone, YOUR DESKTOP is going to make so much more sense. First of all, you've got the add post buff on a desktop.

00:00:14

And you click there and you can now select content from your computer and you can post a video or a image and go and add your text there. You can share stuff

2 MESSAGES you can message people directly then that's obviously to your home newsfeed. But what I also wanted to show you is you can edit Your profile from here which Is such a pleasure..

00:00:44

This is where I all the time go in To quickly CHANGE MY WEBSITE LINK For whatever I'm posting today that I need People to see the website Link so really easy for business admin.

00:00:56

And also you've got your SETTINGS, although it looks a little bit different, but there are headings. Remember I showed you privacy and security.

00:01:06

Your professional account. CHANGE YOUR PASSWORD. All those so this is possible here. Just looks a little bit different, although the headings are the sections obviously.

00:01:15

Here you find your Post, Your Reels, Your Videos, Any Saved Content. Remember that's also a great place to come back and re purpose content.

00:01:23

You found that you love, so you see a post. You save it and here you can go and look at your save content and you can come back and make posts.

00:01:34

Using that as an idea so you would open this and don't work on the other screen to create.
